Private AI
For GCP
New Vertex Models allow
the All-GCP solution for
corporate customers
State Change Labs

The $10B Opportunity

Midsized Companies - GCP Customers - want to query their knowledgebases without exposing their secrets to external services.

AI + Security = Profit

The Solution: GCP for GCP

- Gecko, Chirp and Palm 2
- Vertex Matching Engine to provide context
- Focus on easy loading of (gecko) embeddings from multimodal data

Product Model

- Pre-built, langchain-integrated API for loading
- Chainlit front end for fast user prototyping
- Custom integration with existing multimodal data: meeting recordings, text, etc

successful software companies

Akshay Rakheja

AI Engineer at The Canada
Startup Company

6x Hackathon Winner,
MEng in Electrical & Computer Eng 2022

Next Steps

- Combine matching tech with a user interface for presentations
- Talk to GCP customers for opportunity (Look to Azure for how they are working this sale with private OpenAI)
- GCP needs to fix Matching Engine pricing

Thank you!

We appreciate the opportunity to learn this exciting new technology this weekend.
